John Sampson
7940 Pacafic
Omaha 6, Nebraska

Dear Mr. Sampson:

This will verify your reception of radio station KBMY on the morning of December 7, 1954 between the hours of 1:30 am and 1:40 am, MST.

Mnay thanks for your reception report Mr. Sampson. It always makes us feel good to hear that we are more than holding our own with WEDC. Our antenna here is an electrical half wave-length high (406') and under normal conditions gives us very good coverage for our power of just 250 watts.

Our transmitting equipment is Gates using push-pull 810's in the final rf amplifier with a pair of 810's as modulators. Antenna is of uniform cross-section, guyed.

For your future information, KBMY runs a test program monthly, on the first Tuesday of each month at 1:30 to 1:45 am, MST.

Sincerly,

T.A. Hildebrand

T. A. Hildebrand, Chief Eng.
